5. Dimension 3 DISCIPLINARY CORE IDEAS—PHYSICAL SCIENCES. Most systems or processes depend at some level on physical and chemical subprocesses that occur within it, whether the system in question is a star, Earth's atmosphere, a river, a bicycle, the human brain, or a living cell. Large-scale systems often have emergent properties that cannot be explained on the basis of atomic-scale ...

The core values or clusters of core values identified can be regarded as “basic value assumptions” that underlie a HSW prevention culture. They form a natural and perhaps necessary aspect of a prevention culture, complementary to a focus on rational and informed behavior when dealing with HSW risks. The core values are also likely to support the development of OSH management systems and ...

Using model plants, such as Arabidopsis, you'll look at the development of modern plant biology and genetics and then explore the applications of biotechnology in plant science. You'll also examine the importance of plant nutrition and how the interaction with pathogens is crucial to plant growth and production. You'll have a mix of lectures and practical laboratory sessions to apply ...

$R(6) = 2.718281828 - (0.1 * 6)$ $R(6) = 0.5488 = \sim 55\%$. In other words, after six years, about 45% of the population of identical motors operating in an identical application can probabilistically be expected to fail. It is worth reiterating at this point that these calculations project the probability for a population. Any given individual from the ...

The root provides mineral nutrients and water to the plant. Diffusion barriers seal the root, preventing the loss of internal water and nutrients. Salas-González et al. found that microbes living on and in roots of the model plant *Arabidopsis thaliana* influence diffusion barrier formation, which affects the balance of mineral nutrients in the plant (see the Perspective by Busch and Chory).

This person is like a plant—they do not talk. In the second case, either their utterance signifies something, or it signifies nothing. If it signifies something, then they say that something is so-and-so (which Aristotle takes to be self-defeating for them). If it signifies nothing, then it does not qualify as speech. Even though they make an utterance, the person is in effect not speaking ...

Domestic cats and other felids rub their faces and heads against catnip (*Nepeta cataria*) and silver vine (*Actinidia polygama*) and roll on the ground as a characteristic response. While this response is well known, its biological function and underlying mechanism remain undetermined. Here, we uncover the neurophysiological mechanism and functional outcome of this feline response.
