Depending on event I'll just stick to Stryd for pace and cadence... If I can pair my Dual HRM and Stryd to my watch then watch to the aTV without dropouts that would be great. Also, as you noted, the pacing displayed on my watch from the Stryd is never inline what is displayed on Zwift. I have to regularly calibrate on Zwift in order to try and match my watch. Rebroadcasting the pace from ...

Time series data is unique in that it has a natural time order: the order in which the data was observed matters.The key difference with time series data from regular data is that you're always asking questions about it over time. An often simple way to determine if the dataset you are working with is time series or not, is to see if one of your axes is time.
